

**GRADUATE DIVISION PROGRAM OUTCOMES:
3-Year Summary
2021, 2022 and 2023**

Publications:	PhD	MD-PhD
Total number of graduating PhD students per 3-year period with one or more 1 st author publications in peer-reviewed scientific journals	51 (91%)	30 (93%)

	PhD	MD-PhD
Average number of 1st author publications per graduating PhD student	1.54	2.57
Average number of total publications per graduating PhD student	5.11	5.83

First job after graduation:	PhD	MD-PhD
Academic	34 (60%)	30 (100%)
Non-academic*	20 (36%)	0
Unknown	2 (4%)	0

*includes science-related careers

**Important note: Einstein uses the designations “academic” and “non-academic” to characterize jobs after graduation. Since the NIH Director’s Biomedical Research Workforce Report (2012), it has been widely recognized that many PhD graduates enter both tenure-track positions as well as science-related careers in a wide-variety of areas. Therefore, the NIH recognizes that any science-related career, whether academic or non-academic, is a favorable outcome for a PhD program. Under this definition, nearly all Einstein PhD graduates (>95%) are considered to be in science-related careers.*
