

EINSTEIN-ROCKEFELLER-CUNY CENTER FOR AIDS RESEARCH **NEWSLETTER**

Message From The ERC-CFAR Director Harris Goldstein, MD

Welcome to the Spring Edition of the ERC-CFAR newsletter! I am delighted to share many exciting developments and plans in the ERC-CFAR. In April, we invited our External Scientific Advisory Committee (ESAC) to participate in a morning of strategic planning. Each of our cores and SWG presented their successes and struggles from the last year and the ESAC was able to provide cogent advice that our cores and SWG will be able to heed to provide more support to our researchers.

Our catalytic pilot program has been very successful in the past, and many of our past awardees received larger NIH grants based on their pilot research. Our next Catalytic Pilot application is accepting applications, please see the RFA below. I encourage all Early-Stage Investigators and new HIV/AIDS researchers to apply.

I am eager to share that late last week, the NIH CFAR Program leadership sent me the outcome of their review of the five administrative supplement applications submitted in response to the recent CFAR Administrative and EHE supplement announcements. I am delighted to inform you that our ERC-CFAR investigators were highly successful with four of the applications selected for funding. It is very noteworthy that one of these successful supplements was submitted in response to the CFAR Diversity, Equity, and Inclusion Pipeline Initiative with the support of the Einstein Senior Associate Dean for Diversity, Equity, and Inclusion, **Lynn Holden, MD**, and will enable us to join the other CFARs in participating in this important program. Please see more details below. We may be recruiting you to be mentors for future participants in this program. While this information is not a notice of award, I am highly optimistic that they will be funded.

Last month, we awarded a pilot award to **Barbara Milrod, MD**, Professor of Psychiatry and Behavioral Sciences, and **Jack Keefe, PhD, PRIME** Research Fellow, for \$50,000 to pilot a feasibility proposal to adapt trauma-focused psychodynamic psychotherapy (TFPP) for people living with HIV and PTSD.

Lastly, I am excited to announce that we will be hosting the annual National CFAR Directors Meeting in November of 2024 which brings together the leadership of the 19 CFARs. The National CFAR Meeting will be an excellent opportunity to showcase our research and collaborations between our three institutions. The three-day event will include a full-day scientific symposium, mentorship meetings for ESIs, sessions with the NIH program leads, meetings for the community advisory boards and much more.

ERC-CFAR AWARDS

New NIH Grant Awards

Congratulations to **Marina Caskey, MD**, Professor of Clinical Investigation at Rockefeller University and Associate Director of the ERC-CFAR, on receiving a five-year, \$4.3 million **grant** from NIAID to support the first-in-human study of a potent anti-HBsAg neutralizing antibody.

Congratulations to **Jonathan Shuter, MD**, Professor of Medicine and Epidemiology & Population Health (Einstein), for receiving a five-year, \$3.5 million **grant** from the NIH to support research on a harm reduction strategy for PLWH who smoke cigarettes.

Congratulations to **Betsy Herold, MD**, Professor of Pediatrics, Microbiology & Immunology, and Obstetrics & Gynecology and Women's Health (Einstein) and Associate Director of the ERC-CFAR, on receiving a five-year, \$3 million **grant** from NIAID to support research on optimizing the generation of monoclonal antibodies for prevention and treatment of HSV disease.

NIH Supplements

The NIH CFAR Program leadership has recommended funding for four of the ERC-CFAR applications in response to the NIH's latest announcement for CFAR Administrative and EHE Supplements.

Hector R. Perez, MD, Associate Professor of Medicine, **Jonathan Ross, MD, MS**, Associate Professor of Medicine, **Reginald Hayes, BS, BMus, MDiv**, Assistant Dean For Diversity Enhancement at Einstein, and **Lynn Holden, MD**, Senior Associate Dean for Diversity and Inclusion at Einstein applied for funding for the ERC CFAR's new CFAR Diversity, Equity, and Inclusion Pathway Initiative (CDEIPI). The program, titled "Increasing diversity in HIV science: Bronx-CHAMP" will increase the number of Underrepresented Minorities (URM) / Black, Indigenous, and People of Color (BIPOC) trainees who are engaged in HIV science at the high school, undergraduate, graduate (masters, doctoral or medical) and post-doctoral levels and develop pathways for these "CFAR Scholars" to successful careers in science and medicine.

Matthew Akiyama, MD, Associate Professor of Medicine applied for funding to study "A Decentralized, Status neutral, Stakeholder-engaged intervention for people living with and at risk for HIV post-incarceration: The DEST2nation Study."

Laurie Bauman, PhD, Professor of Pediatrics, Psychiatry, and Behavioral Sciences, applied for funding to study "Pharm4PrEP: Developing and Testing a Pharmacy-Driven Model of PrEP to Address Health Inequities in Access."

Mike Bogaisky, MD, Associate Professor of

Medicine, along with **Anjali Sharma, MD, MS**, Professor of Medicine, and **Laurie Bauman, PhD** applied for funding to study “Implementation of a Fall Risk Screening Protocol for Older Adults In an HIV Practice.”

Other Awards

Congratulations to **Viraj Patel, MD, MPH**, for receiving the Department of Medicine Award for Mid-Career Excellence. The award recognizes his commitment, dedication, experience, expertise, and contributions to clinical medicine and education. In the words of **Julia Arnsten, MD, MPH**, who nominated him, “*Dr. Patel has made invaluable contributions to global and HIV health programs, provided direct primary care for patients at Montefiore’s Comprehensive Health Care Center, led Montefiore-wide clinical and educational initiatives, and successfully taught and mentored trainees at all levels.*” Dr. Patel is also featured in the May edition of the **Department of Medicine’s enCOMPASS Newsletter**.

Congratulations to several ERC-CFAR members who recently received Tenure at Einstein:

Earle C. Chambers, PhD, MPH, Professor of Family and Social Medicine, Psychiatry and Behavioral Sciences, and of Epidemiology & Population Health

Marina Konopleva, MD, PhD, Professor of Oncology and Molecular Pharmacology

Shadi Nahvi, MD, MS, Professor of Medicine and of Psychiatry and Behavioral Sciences

Marcel Yotebieng, MD, PhD, MPH, Professor of Medicine

News From the ERC-CFAR Cores

Catalytic Research Projects on HIV/AIDS-Related Research Due July 31

- Up to two projects to be funded
- Budgets can be \$50,000 or \$75,000
- For ERC-CFAR Early Stage Investigators (ESIs) or any Einstein, Rockefeller, or CUNY researcher new to HIV/AIDS
- **Due July 31, 2023**

Questions? Contact **Sonya Rusanov** or **Georgia Veroutis**

**Read Full RFA
Here**

The Developmental Core also hosted a very successful webinar earlier this month titled "How to Obtain an ERC CFAR Catalytic Pilot Grant". Over a dozen ESIs and new-to-HIV/AIDS researchers joined the meeting to learn skills and tips for successfully applying for ERC-CFAR pilot grants.

ERC-CFAR Trans-Institutional Seminar Series

The ERC-CFAR Trans-Institutional Seminar Series takes place every other Friday at 9 AM on Zoom, where investigators from the ERC-CFAR present updates on their research, look for collaborators, and receive feedback from other researchers. ESIs who present are also invited to a private session afterward with several members of the Developmental Core for mentorship and advice.

We are starting to schedule seminars for the next academic year, please contact **Sonya Rusanov** if you would like to present for either a half-hour or full-hour slot.

New Publications (ERC-CFAR Members in Bold)

HSV-2 Triggers Upregulation of MALAT1 In CD4+ T Cells And Promotes HIV Latency Reversal

Pierce CA, Loh LN, Steach HR, **Cheshenko N**, Preston-Hurlburt P, Zhang F, Stransky S, Kravets L, **Sidoli S**, Philbrick WM, Nassar MN, Krishnaswamy S, Herold KC, **Herold BC**. J Clin Invest. 2023 Apr 20:e164317. doi: 10.1172/JCI164317. Epub ahead of print. PMID: 37079384.

Co-infection with herpes simplex virus type 2 (HSV-2) significantly contributes to the HIV epidemic. Epidemiological studies consistently show that HSV-2 increases the risk of acquiring HIV. Dual infection of HIV and HSV-2 leads to more frequent HIV viremic episodes, larger HIV-1 tissue reservoirs, and increased divergence from the most recent common ancestor, even in patients on antiretroviral therapy. This suggests that HSV-2 affects the maintenance and reactivation of the HIV reservoir. Understanding the molecular mechanisms by which HSV-2 negatively impacts HIV could help identify new strategies for ending the HIV epidemic. The hypothesis was that exposure of activated CD4+ T cells to HSV-2 locally (skin or mucosa) induces transcriptional changes in HSV-infected and bystander cells, triggering HIV reactivation and replication. To test this, CD4+ T cells from HIV-infected individuals and 2D10 cells (a Jurkat T cell model of HIV latency) were exposed to HSV-2. HSV-2 infection increased HIV protein and gene expression in cells from HIV+ patients and triggered HIV latency reversal in 2D10 cells. Bulk and single-cell RNA sequencing studies identified transcriptional changes in CD4+ T cells exposed to HSV-2, including decreased expression of restriction factors and increased expression of transcripts that could promote HIV reactivation and replication. These changes were observed in both infected and bystander cells, with a stronger response in infected cells. The focus was on MALAT1, a long noncoding RNA highly expressed in immune cells that regulates gene expression. Upregulation of MALAT1, decreased histone H3 protein trimethylation, and HIV latency reversal were observed upon transfection of 2D10 cells with VP16, an HSV-2 protein that regulates transcription. Knockout of MALAT1 reduced the response to VP16 and HSV-2 infection, highlighting its role in

HSV-2-induced HIV reactivation. These studies were a collaboration between Einstein and Yale investigators.

Longitudinal Associations of Psychiatric Risk Factors with Non-psychiatric Hospitalization in a Large Cohort of People Living with HIV in New York City

Breslow AS, Fazzari M, Franz PJ, Hanna DB, Felson UR, Cavig E, Fisher MR, Bauman L. . AIDS Behav. 2023 Apr 21. doi: 10.1007/s10461-023-04064-6. Epub ahead of print. PMID: 37084105.

Pathways to an HIV Cure

September 7, 2023 12-5 PM Rockefeller University

The Einstein-Rockefeller-CUNY CFAR and the Delaney REACH for the Cure Present

A NYC-WIDE RESEARCH SYMPOSIUM: PATHWAYS TO AN HIV CURE

Scheduled Speakers and Topics

HIV Reservoir and Persistence

**John W. Mellors, MD**

Distinguished Professor of Medicine
University of Pittsburgh School of Medicine

**Ya-Chi Ho, MD, PhD**

Associate Professor of Microbial Pathogenesis and Medicine
Yale School of Medicine

**Katherine Bar, MD**

Assistant Professor of Medicine
Perelman School of Medicine at the University of Pennsylvania

Immune Control of the Reservoir

**Rafick-Pierre Sékaly, PhD**

Professor of Pathology and Laboratory Medicine
Emory University School of Medicine

**Michael R. Betts, PhD**

Professor of Microbiology
Perelman School of Medicine University of Pennsylvania

**Rachel Rutishauser, MD, PhD**

Associate Professor of Medicine
University of California, San Francisco School of Medicine

In Vivo HIV Cure Trials

**Steven Deeks, MD**

Professor of Medicine in Residence
University of California, San Francisco School of Medicine

**Pablo Tebas, MD**

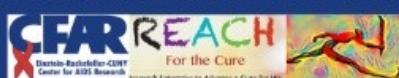

Professor of Medicine
Perelman School of Medicine at the University of Pennsylvania

**Ann Chahroudi, MD, PhD**

Associate Professor of Pediatrics

HIV Related Funding, Training, and Mentoring Opportunities

New HIV Vaccine Trial to Optimize ALFQ Adjuvant Dosage is Enrolling at WRAIR

The U.S. Military HIV Research Program (MHRP) at the Walter Reed Army Institute of Research (WRAIR) and collaborators recently launched a Phase 1 trial that will evaluate safety, tolerability, and immunogenicity of varying doses of the Army's novel ALFQ adjuvant in a candidate HIV vaccine to optimize adjuvant dosage. For more information including eligibility, please see the flyer [here](#).

SAMHSA Funding Opportunity: Substance Use and HIV Prevention Navigator Program for Racial/Ethnic Minorities

The Substance Abuse and Mental Health Services Administration (SAMHSA) is offering a funding opportunity to support substance use and HIV prevention services for racial and ethnic minority populations at high-risk for substance use disorders (SUDs) and HIV infection. **Applications are due June 20.**

WHO Online Scoring Survey: Research Priorities for Sexually Transmitted Infections

The World Health Organization (WHO) is undertaking a global research priority setting exercise for sexually transmitted infections (STIs), to address the most pressing gaps in STI prevention, management, and control. And currently asking for input from STI stakeholders through the survey [here](#), which should take 20-25 mins.

ISCI Resources: Implementation Science Webinars and More

ISCI has available links to webinars that feature an array of topics including presentations guiding users through implementation science (IS) and implementation research (IR).

Positions Available with CDC/NCHHSTP

Available job opportunities at National Center for HIV, Viral Hepatitis, STD, and TB Prevention can be accessed through this [link](#).

NIH Office of AIDS Research Seeks Physician and Budget Analysts

NIH OAR is seeking exceptional candidates with diverse skill sets to provide direction on the planning, development, and implementation of NIH HIV research.

NIH Grants

Interventions for Stigma Reduction to Improve HIV/AIDS Prevention, Treatment and Care in Low- and Middle- Income Countries (R01 - Clinical Trial Optional)

Funding Opportunity Number: PAR-23-190

Posting Date: May 10, 2023

Closing Date: December 20, 2023

HIV-associated Non-Communicable Diseases Research at Low- and Middle-Income Country Institutions (R21 Clinical Trial Optional)

Funding Opportunity Number: PAR-23-191

Posting Date: May 10, 2023

Closing Date: December 8, 2023

Innovation for HIV Vaccine Discovery (R01 Clinical Trial Not Allowed)

Funding Opportunity Number: PAR-23-169

Posting Date: April 21, 2023

Closing Date: August 2, 2023

Synthetic Nucleic Acid Platforms for HIV-1 (SNAPH): (R61/R33 Clinical Trial Not Allowed)

Funding Opportunity Number: RFA-AI-23-026

Posting Date: April 21, 2023

Closing Date: August 2, 2023

International Research in Infectious Diseases (R01 Clinical Trial Not Allowed)

Funding Opportunity Number: RFA-AI-23-023

Posting Date: April 14, 2023

Closing Date: August 2, 2023

Understanding Persistent Oral Human Papillomavirus and Human Immunodeficiency Virus Co-infection and Its Role with Oropharyngeal Cancer Induction (R21 Clinical Trial Not Allowed)

Funding Opportunity Number: RFA-DE-24-002

Posting Date: April 7, 2023

Closing Date: July 24, 2023

Understanding Persistent Oral Human Papillomavirus and Human Immunodeficiency Virus Co-infection and Its Role with Oropharyngeal Cancer Induction (R01 Clinical Trial Not Allowed)

Funding Opportunity Number: RFA-DE-24-001

Posting Date: April 7, 2023

Closing Date: July 24, 2023
