

Albert Einstein College of Medicine

**GRADUATE DIVISION PROGRAM OUTCOMES:  
3-Year Summary  
2023, 2024 and 2025**

<b>Publications:</b>	<b>PhD</b>	<b>MD-PhD</b>
Total number of graduating PhD students per 3-year period with one or more 1 <sup>st</sup> author publications in peer-reviewed scientific journals	67 (91%)	26 (96%)

	<b>PhD</b>	<b>MD-PhD</b>
Average number of 1st author publications per graduating PhD student	1.70	2.41
Average number of total publications per graduating PhD student	4.85	5.22

<b>First job after graduation:</b>	<b>PhD</b>	<b>MD-PhD</b>
Academic	29 (39%)	27 (100%)
Non-academic*	42 (57%)	0
Unknown	3 (4%)	0

\*includes science-related careers

*\*Important note: Einstein uses the designations “academic” and “non-academic” to characterize jobs after graduation. Since the NIH Director’s Biomedical Research Workforce Report (2012), it has been widely recognized that many PhD graduates enter both tenure-track positions as well as science-related careers in a wide variety of areas. Therefore, the NIH recognizes that any science-related career, whether academic or non-academic, is a favorable outcome for a PhD program. Under this definition, nearly all Einstein PhD graduates (>95%) are considered to be in science-related careers.*
