CLINICAL RESEARCH CENTER

Einstein Campus
Van Etten Building
4th Floor, B Wing

Montefiore Campus
Moses Research Pavilion
4th Floor

<https://einsteinmed.edu/centers/ictr/>

ictr@einsteinmed.edu

The Clinical Research Center (CRC) supports studies across the spectrum of biomedical research, including adult and pediatric studies. The CRC is a flexible resource that can be utilized to enhance study team capacity to conduct research studies.

Our vision: Provide a comprehensive clinical research infrastructure that includes trained nursing, research coordinators and training resources, to safely, effectively, and efficiently conduct patient-oriented research that accelerates the translation of scientific discoveries into improved health outcomes.

We curate support to fit your unique study needs- [request CRC services](#) today!

Summary of Visit Types

SPACE ONLY	No nursing support needed.
STANDARD	Vital signs, anthropometrics, 1-time blood draw, other body fluid specimen collection, rapid oral HIV test, urine pregnancy test, electrocardiogram (ECG), questionnaires, oral medication administration, 1-time injection, IV infusion, no more than 1-hour patient's observation needed.
ENHANCED STANDARD	Multi-time point collection of blood draws, ECGs, and/or vital signs. Visits that require a standardized medical procedure or test to be performed after study-specific specialized training.
COMPLEX	IV placement and/or medication administration, pharmacokinetic studies, frequent vital sign monitoring, multiple blood draws, biopsy or meal tests. All intensive visits that require constant patient observation.

Additional Services

InBody Device Usage: Detailed body composition analysis by multifrequency bioimpedance spectroscopy

Specimen Processing, Shipment, and Storage: Support available through the Biomarker and Biorepository Core, with lab services co-located with the Clinical Research Center.

RESEARCH COORDINATOR SUPPORT SERVICE

<https://einsteinmed.edu/centers/ictr/>

CRC-CoordinatorSupport@einsteinmed.edu

The Clinical Research Center offers a study coordinator service that can be deployed to support study teams.

We curate support to fit your unique study needs- [schedule a consultation](#) today!

Services include, but are not limited to:

Regulatory compliance	Prepare and maintain regulatory and source documentation for IRB, data safety monitoring board, sponsor or others.
Participant identification, enrollment and retention	Pre-screening existing participant charts, recruitment material development, recruitment activities and screening of study participants, obtain consent, long-term participant follow-up support.
Project management	Planning, implementation and coordination of clinical research studies from feasibility to close-out.
Study visit activities	Obtain informed consent, conduct study visits, implement a study protocol.
Data management	Data collection and entry, validation, query resolution, support from case report form creation to database lock.

Flexible pricing may be available for junior investigators on a case-by-case basis.
