Kevin Fiori MD, MPH, MS

Experiments in Implementation Research: Community Health Worker programs from Northern Togo to the South Bronx

Kevin Fiori MD, MPH, MS is an Associate Professor in both the Division of Academic General Pediatrics and Department of Family and Social Medicine at Albert Einstein College of Medicine. He is the Vice Chair for Community Health & Engagement and inaugural Division Chief for the Division of Community and Population Health within the Department of Pediatrics, the Executive Director, Community Health Worker Institute at Montefiore and the Director-Social Determinants of Health at the Office of Community & Population Health, Montefiore Health System. His research aims to address health disparities in communities both in the Bronx and abroad. In 2004 as part of a Peace Corps service in Togo, West Africa, he co-founded an international non-governmental organization called Integrate Health to support community health initiatives. Dr. Fiori’s teaching activities focus on global health, clinical pediatrics, health service delivery, and social medicine. He co-directs the Global Health Elective course for the Department of Pediatrics and is an advisory board member for the Global Health Center at the Albert Einstein College of Medicine. Dr. Fiori’s clinical activities are based in the South Bronx providing primary care to families at a Federally Qualified Health Center.

Wednesday, November 29th at 1pm
